

DEVELOP A PYTHON SCRIPT

Team ID	PNT2022TMID508060
Project Name	Personal Assistant for senior people who are self-reliant

SCRIPT:

```
a=int(input())  
b=int(input())  
c=a+b  
print ("The sum is", c)
```

The screenshot displays the PyCharm IDE interface. The main editor window shows a Python script named `main.py` with the following code:

```
1 a=int(input())  
2 b=int(input())  
3 c=a+b  
4 print ("The sum is", c)
```

The bottom panel shows the Run output for the script. The command executed is `C:\Users\HP\PycharmProjects\IBM\venv\Scripts\python.exe C:/Users/HP/PycharmProjects/IBM/main.py`. The output shows the program running successfully, displaying the sum of the input values:

```
4  
8  
The sum is 12  
Process finished with exit code 0
```
