Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users. \wp

1 Phases High-level steps your user needs to accomplish from start to finish	Compare	Decide	Login	Use
2 Steps Detailed actions your user has to perform	Ask friends for suggestion Checking existing app	Decide to use the application	Try the application and fill details about medicine	Alert user by voice commands at correct time
3 Feelings What your user might be thinking and feeling at the moment	Excited to know the working of the new system	Bothering about consuming medicine	Feeling comfortable about medication	My health under my control
	Suspicious about the application	Coming across bad reviews	Medicine was not refilled	Lowing down of change on device
